

Cast In Order Of Appearance:

**Interviewer
Professor**

SFX: opening theme

INTERVIEWER : So, Professor Tally, I understand you've been measuring dinosaurs for a long time now.

PROFESSOR : Yes, quite some time.

INTERVIEWER : What problems did you initially foresee?

PROFESSOR : Well, my main concern was keeping them still. It's hard to measure something when it's moving.

INTERVIEWER : But aren't dinosaurs extinct?

PROFESSOR : Quite. So that made my theory even more understandable.

INTERVIEWER : What theory is that?

PROFESSOR : Dead things do **not** move around very much.

INTERVIEWER : I see. What are the average sizes of dinosaurs?

PROFESSOR : Oh, they come in economy, small, medium, large, really large and really really large.

INTERVIEWER : Those don't sound like very accurate measurements.

PROFESSOR : Well, it's hard to be accurate when you can't see the end of the tape measure, now isn't it? By the time the tape has reached the other end of most dinosaurs it's really hard to see. So I sort of... wing it.

INTERVIEWER : Why don't you lay the tape down and walk to the other end and read it that way?

PROFESSOR : I had thought of that, but I think it would be a bit dangerous, don't you?

INTERVIEWER : I don't understand.

PROFESSOR : Well, I don't know about you, but I certainly don't want to stand next to the rear end of a dinosaur. You never know what it might... smell like.

INTERVIEWER : But they're extinct. They -

PROFESSOR : Precisely my point. And what made them extinct?

INTERVIEWER : Excuse me?

PROFESSOR : It could have been something they ate, now couldn't it?

SFX: closing theme

INTERVIEWER : Yes, well, thank you. This has been a most interesting interview. This is Minka Mook for the CCC - Continuous Caveman Coverage.
